BOROUGH OF ST. IVES (HUNTS)

ANNUAL REPORT

OF

MEDICAL OFFICER

OF HEALTH

AND

HEALTH INSPECTOR

FOR 1957

ANNUAL REPORT
of the Borough of St. Ives (Hunts) for the year ending.
31st December, 1957

To:—

The Mayor, Aldermen and Councillors of the Borough of St. Ives (Hunts).

Your Worship and members of the Council,

I have the honour to submit my Annual Report on the Health and Sanitary Conditions of the Borough for the year 1957.

The Birth Rate indicates an appreciable increase over last year's figure and still remains well above the average for England and Wales as a whole.

The Death Rate on the other hand shows a slight decrease and now virtually equals the national figure.

Apart from a small outbreak of measles during the first half of the year the town has been comparatively free from notifiable infectious disease and it is a pleasing feature to note the continued absence of Poliomyelitis and Diphteria.

Vaccination against Poliomyelitis continued successfully during the whole of 1957 as far as the limited supplies permitted. All vaccination was achieved with British manufactured vaccine.

The need for additional housing accommodation still remains within the Borough and will be aggravated considerably when the Slum Clearance programme is speeded up.

The water supply to the Borough continues to be generally satisfactory but the pressure in the Houghton Hill area should be considerably increased and it is hoped that early consideration will be given to this problem.

In conclusion I should like to thank Members of the Council for their kindness and consideration to me, and to their Officers for all the help which they have given me during another year.

I am, Your obedient Servant,

J. CALDWELL.

Medical Officer of Health.

SANITARY CONDITIONS

1 (1) Water.—The Chesterton and St. Ives Joint Water Board whose main works are situated at Kingston in Cambridgeshire supply water in bulk to the Borough. A satisfactory pressure has been maintained in the greater part of the Borough throughout the year. The total consumption for the year was 45,564,000 gallons which is an increase of 2,725,000 on the previous year.

The water is chlorinated at source by the Board.

77 samples were taken at various points in the Borough during the year, all of which were submitted to the Public Health Laboratory, Cambridge, for examination and report. Of these one was found to be unsatisfactory and this was traced to a faulty tap and corrected.

The rainfall for the year was 22.19 inches, which is about the average for the district and 2.21 inches below the previous year.

	Direct from Main Supply: 1,122	By Stand-pipes: 20	By Public or Private Wells: 10	Direct from Main Supply: 3,286	By Stand-pipes: 60	By Public or Private Wells: 29

(2) Drainage and Sewage.—Apart from general maintenance, no works in connection with drainage and sewerage have been carried out. The provision of an entirely new sewerage scheme has once again been under consideration and the need for this is still an urgent matter. It is hoped that during the coming year progress will be made.

2 Rivers and Streams.—No works of importance were carried out during the year. The ditches which discharge into the River Ouse have been kept clear and no doubt this has assisted in preventing any serious flooding in the area.

3 (1) Closet Accommodation.—The collection and disposal of night soil has again been carried out by the St. Ives Rural District Council's vehicles under contract and the scheme has worked satisfactorily. No complaints were received during the year.

(2) Public Cleansing.—The St. Ives Rural District Council has, under contract, been responsible for the collection and disposal of house refuse including the provision of all labour to carry out the work. No complaints were received during the year and it has still been possible to cover the area by a one day's collection although the volume of refuse continues to increase.

4 Shops and Offices.—No infringements were found and no complaints received during the year.

5 Camping Sites.—No applications were received for the licensing of camping sites in the Borough area during the year and no licenses have been granted previously.

6 Smoke Abatement.—No complaints were received during the year.

7 Eradication of Bed Bugs.—No complaints of infestation were received during the year, and no premises were found to be infested.

INSPECTION AND SUPERVISION OF FOOD

(a) Milk Supply.—The majority of the milk which is retailed in the Borough and delivered in bottles is mainly produced in the area of the St. Ives Rural District. No Complaints were received during the year.

(b) Meat.—The Borough Slaughterhouse, the management of which by agreement with the Council, is in the control of a local Estate Agent, has continued to work satisfactorily. The examination of meat has been carried out by an officer appointed by the Council.
